Gentlemen:

We have your letter of Feb. 25 th. asking for our catalog and price list. We do not put out a catalog or price list on "nursery planting stock. We do furnish a few trees for experimental planting, and to test our seed each year for germination. Gathering Redwood seed is our main interest, as we are located in the heart of the Redwood Eare.

Collecting Redwood seed keeps us busy most all year round. Price for collecting drying and cleaning, packing and shipping prepaid to Retail dealers in quantities 10 lbs. or more \$7.00 per lb. under 10 lbs. \$8.00 to \$12.00 according to amount purchased. for Sequoia Semperviren seed.

Sequoia semperviren seedlings \$.25 to \$1.00 per tree according to size. and age.

Douglas Fir seed when available \$10.00 per lb. in small lots price runs higher. Douglas Fir seed can not be collected every year as it dosen't have seed cones each year. Sometimes seed is destroyed by worms,

We wish to continue having our name on list as a possible source of Redwood seed and seedling trees.

Very truly yours

Chas. O. Williford
